#LegrandImprovingLives

legrand[®]
LIVE THE ADVANTAGE

LIVE THE ADVANTAGE

The Pace Of Today's Life Demands Continuous Upgrades In Efficiency And Ways To Live Smarter. At Legrand, We Anticipate Your Needs With Technologically Advanced Products, Investing As Much As 5% On R&D To Deliver Superior Electrical And Digital Building Infrastructure.

As Global Specialists, We Make Things That Are Not Just Essential But Actually Desirable. Our Engineering Is Exacting, And Is Fuelled

By Design Thinking. We Call This Designering. It's Not Just A Deep Understanding Of Our Markets, But Delivering Innovation And Technology For Uninterrupted Living.

Such Expertise Helps Us Fulfil Your Needs. It Also Ensures That We Keep Introducing Products That Change The Way You Look At Form And Function. The Extraordinary DMX³ Is A Case In Point. It Combines Three Advantages In One Acb To Give You The Advantage.

DMX³ 2500 frame

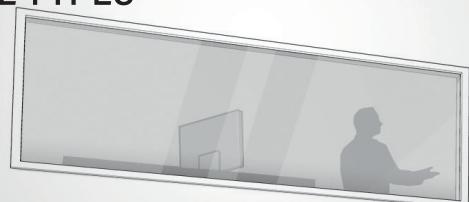

DMX³ 4000 frame

DMX³ ACBs

up to 6300 A

EFFICIENT PROTECTION AND
CONTROL FOR ALL TYPES
OF BUILDING

Thanks to the DPX³ range of MCCBs and to DX³ MCBs you can benefit from the advantages of a complete protection system at any level in the installation

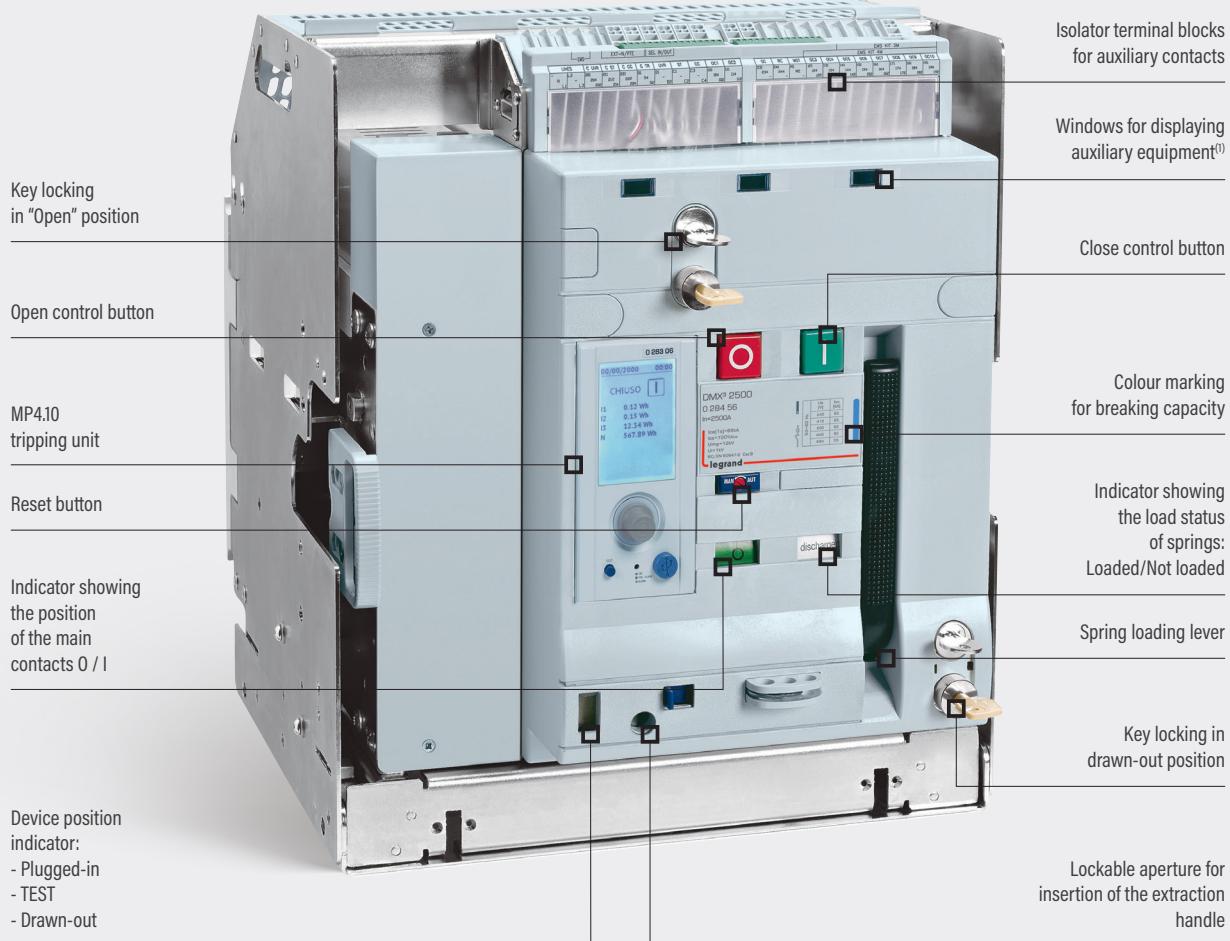

Distribution board equipped with DIN rail and plate-mounting MCBs and DPX³ MCCBs up to 1600 A

Main distribution board equipped with DPX³ MCCBs and DMX³ ACBs up to 6300 A

DMX³ 6300 frame

DRAW-OUT DMX³ 2500 FRAME

Optimized performance up to 6300 A

DMX³ air circuit breakers and DMX³-I isolating switches are available in four frame sizes. Four breaking capacities for circuit breakers: 50 kA, 65 kA and 100 kA.

The range covers 11 rated currents, between 630 A and 6300 A. All ranges of DMX³ air circuit breakers and DMX³-I isolating switches are available in fixed and draw-out version.

DMX³ is equipped with an inbuilt Anti-Pumping feature, which ensures that the mechanism prevents the breaker from repeatedly opening and closing when it receives simultaneous open and close commands.

- DMX³-I
- DMX³ 50 kA
- DMX³ 65 kA
- DMX³ 100 kA

(1) Available only on DMX³ 2500, 4000 and 6300

	4P	465 mm	433 mm	1064 mm	274 kg	

LEGRAND ADVANTAGE

The overall dimensions of the breaker contribute considerably to an efficient use of the space inside the distribution board. The constant depth for all rated currents for the 2500, 4000 and 6300 frames make it easier to configure the enclosures and connect the busbars.

OTHER ELECTRICAL FEATURES

Rated operational voltage Ue: 690 Vac 50/60 Hz
 Rated insulation voltage Ui: 1000 Vac 50/60 Hz
 Rated impulse withstand voltage Uimp: 12 kV
 Utilisation category: B
 Ambient temperature: -25°C to +70°C
 Humidity: +55°C with relative humidity of 95%, conforms to IEC 68-2-30

(2) For trip-free switches, please consult us. (3) Including base.

MP 4.10

ELECTRONIC PROTECTION UNITS

Protection units that adapt perfectly to your project

Besides their easy mounting and connection, strength and good continuity of operation, 2 types of configurable electronic units, with or without integrated measurement function, allow precise adjustment of different limits for current values and time delay. The result is efficient protection against electrical faults and perfect adaptation to each type of installation, while maintaining total discrimination with downstream breakers. The display lets you monitor the measured current values and informs you about fault adjustments and logs (the cause of last trip and maintenance operations).

THE RANGE

Protection units for DMX³ 2500, 4000 and 6300

MP 4.10

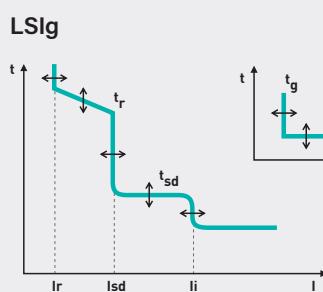

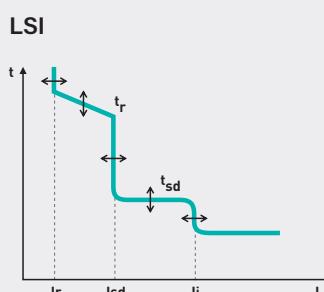

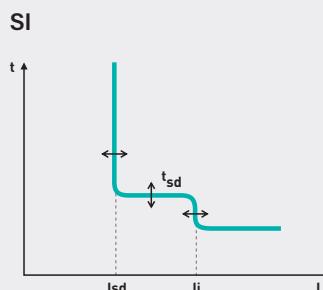

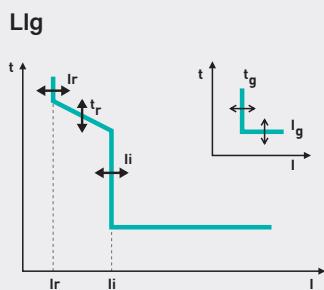

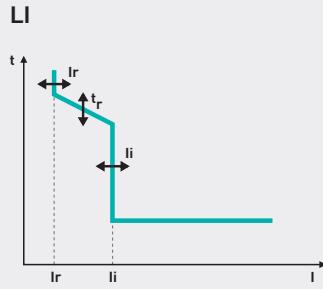

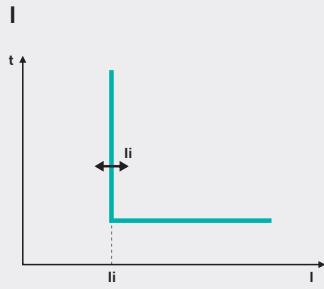

- Graphic LCD display
- Intuitive menu and signalizations
- Navigation and setting through rotary encoder
- LEDs for alarms, warnings and status
- Internal batteries
- Integrated measurements on demand
- Digital password access levels
- External accessorizing by customer (through EMS)
- USB port for connection with Software and wireless communication key
- Local (on display) and by remote (by software/app) configuration opportunities

Without measurement	With measurement
0 283 06	0 283 07

All DMX³ breakers are factory-equipped with MP 4.10 protection units. You just need to select and indicate the 2 catalogue numbers when placing the order (1 for the breaker and 1 for the trip unit).

EXAMPLES OF TRIPPING CURVES

I_r Long time delay protection against overloads
 I_r from 0.2 to $1 \times I_n$ with steps of 1 A
 Protection: ON/OFF

t_r Long delay protection operation time
 t_r from 40 ms to 30 s (@ $6I_r$) with steps of 40 ms
 Thermal memory: ON/OFF

I_{sd} Short time delay protection against short-circuits
 I_{sd} from 1.5 to $10 \times I_r$ with steps of 1 A
 Protection: ON/OFF

t_{sd} Short time delay protection operation time
 t_{sd} from 40 ms to 1 s with steps of 40 ms
 (both $t=k$ and $I_2t=k$)

I_{li} Instantaneous protection against very high short-circuits
 I_{li} from 2 to $15 \times I_n$ or I_{cw} with steps of 1 A
 Protection: ON/OFF

I_g Earth fault current
 I_g from 0.2 to $1 \times I_n$ with steps of 1 A
 Protection: ON/OFF

t_g Time delay on earth fault tripping
 t_g from 80 ms to 1 s with steps of 40 ms
 (both $t=k$ and $I_2t=k$)

I_N Neutral protection
 OFF - 50% - 100% - 200%

Configure your protection devices in complete freedom

The new MP/MP 4.10 protection units are fully configurable. They can be used to adapt settings as closely as possible to the requirements of your installation, either by enabling/disabling the different protection devices (currents and tripping times), or by altering the different trip thresholds. The tripping curve is thus fully customised to suit the real-life conditions of each project.

Protection units with integrated measurement function can also be used to display voltages, active and reactive powers, frequency, power factor, and also energy, in addition to monitoring currents. Alarms can be programmed on a number of these parameters: max. voltage, min. voltage, voltage unbalance, max. and min. frequency, etc.

MANAGEMENT WITH SOFTWARE AND APP

Protection units can be managed: directly on the protection units (using the rotary selector switch), on a PC pre-equipped with the Power Control Station software or on a tablet or smartphone via the EnerUp + Project app.

Power Control Station software for PCs or EnerUp + Project app for smartphone/tablet can be used to exchange data with the protection unit of the DMX³. The software or the app can be used to:

- monitor the status of the breaker
- display information (firmware and device versions, alarms, measurements, parameters, fault history, settings)
- configure the different protections ⁽¹⁾

- update the firmware of the protection unit ⁽²⁾
- generate reports based on the data stored and read by the protection unit ⁽¹⁾
- run diagnostic tests
- upload to the Cloud the data linked to your profile and installation (only with EnerUp + Project app.)

⁽¹⁾ Only with Power Control Station software

⁽²⁾ Only for Legrand technical assistance via Power Control Station software

CONFIGURATION ON A PC

with the Power Control Station software

Any model in the MP 4.10 range

Start menu

This menu displays the values of I1, I2, I3, IN and Ig, the type and status of the circuit breaker, the breaking capacity, the number of poles, the neutral position, the temperature and overtemperature intervention threshold.

Configuration menu

This menu can be used to set the different breaker parameters according to the tripping curves (time/current and ground fault curves).

MANAGEMENT ON A SMARTPHONE/TABLET

EnerUp + Project app available from the Apple Store and Google Play

EnerUp + Project App.

0 283 10
Bluetooth Dongle

Start menu

This menu gives access to different options like: overview of connected devices, real-time monitoring, device test, etc...

Device overview menu

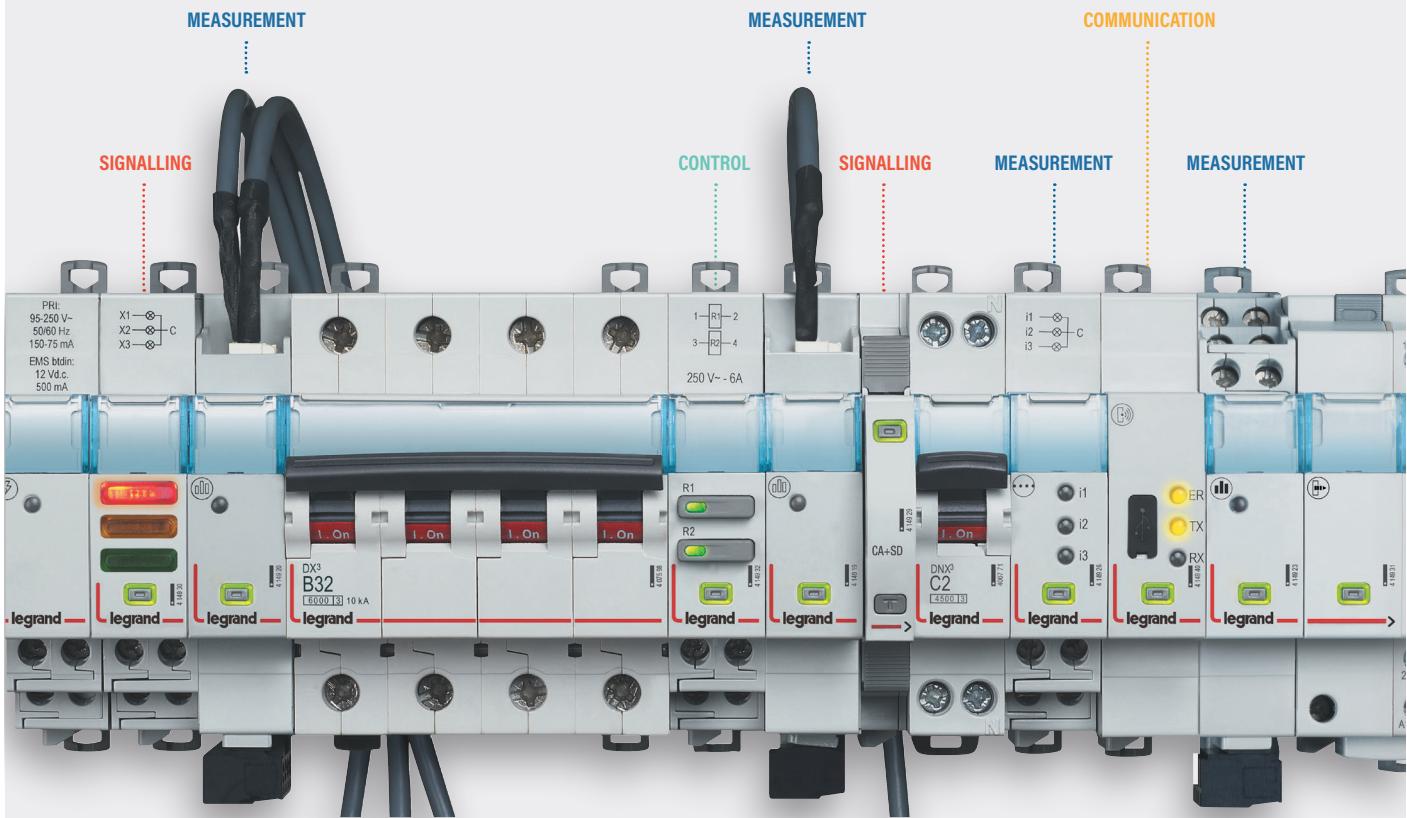

This menu displays the essential information linked to the circuit breaker like: the name, serial number, location, status and the circuit breaker parameters.

Real-time monitoring menu

This menu displays the values of the current, voltage, power and the status of the circuit breaker.

CX³ EMS

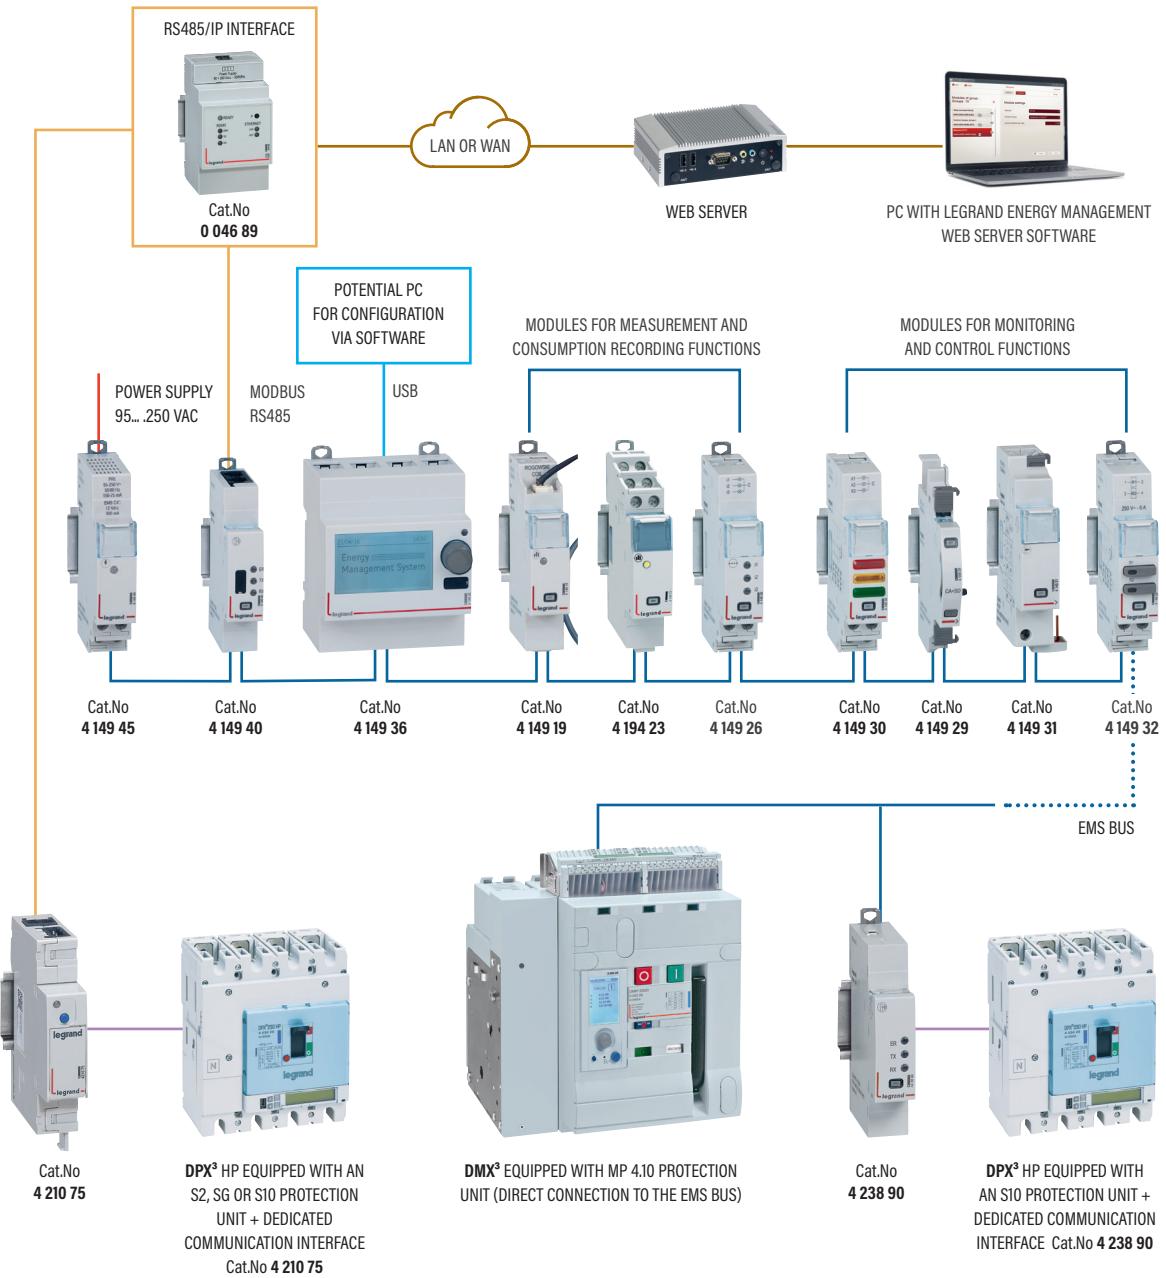

A universal, innovative system for energy management

The CX³ EMS energy management system is used to supervise and manage a building's energy consumption, ensuring reliability and continuity of service, for optimum installation efficiency. It offers the option of viewing, measuring and controlling the installation remotely and/or locally. Thanks to the innovative automatic connection process, this autonomous and fully integrated system simplifies mounting and does not require changes to the existing distribution boards wiring. The CX³ EMS system consists of modules to be mounted on a DIN rail. There is no minimum number of modules and it can also be used to perform very basic supervision tasks. Thanks to its scalability, new functions can be added at any time to suit the needs of the installation.

SCHEMATIC DIAGRAM

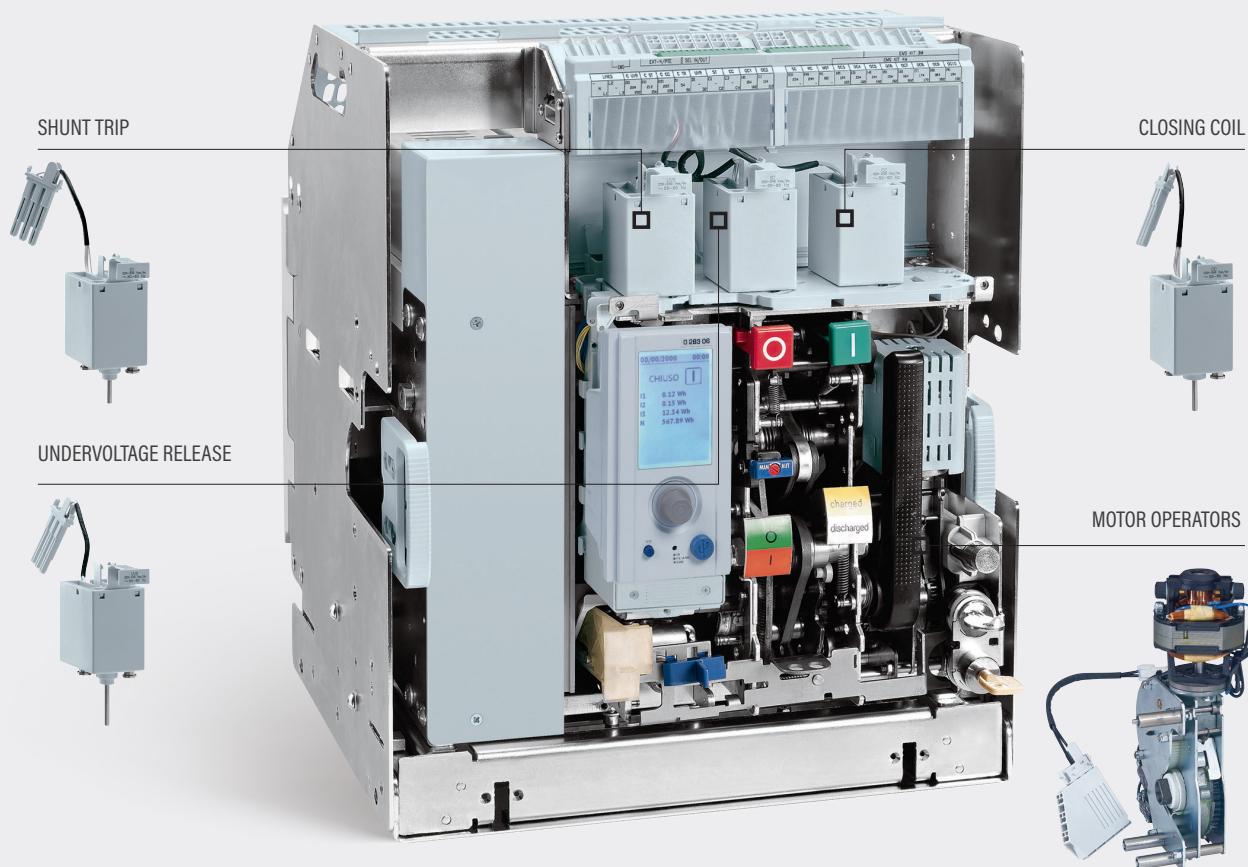

CX³ EMS modules are compatible with all Legrand protection devices, from the simple DIN rail mounting circuit breaker, to DPX³ MCCBs or DMX³ ACBs.

LEGRAND ADVANTAGE

For DPX³ and DMX³ devices equipped with protection units with integrated measurement, the measured values are automatically fed back to the Legrand Energy Management Web Server software.

DRAW-OUT
DMX³
2500 FRAME

Fast clipping control accessories

You can remotely control the DMX³ thanks to its range of accessories: shunt trips, undervoltage releases, motor operators. All the control accessories are simply clipped on to the front panel of the circuit breaker, which is specially configured in order to facilitate clipping, and closing coils. Every type of accessory is compatible with its own location, in order to avoid any possible mistake.

All control accessories can easily be installed without any special tool and in a very short time. They should be installed on the front of the air circuit breaker. In that way, the separation between power and control circuits is guaranteed.

LEGRAND ADVANTAGE

Electrical connection is made in no time thanks to the fast connector supplied on all the above accessories.

OTHER ELECTRICAL FEATURES

Number of control auxiliaries: 2
Shunt trip: 1
Undervoltage release: 1
Closing coils: 1

SHUNT TRIP

Shunt trips are devices used for remote instantaneous opening of the air circuit breaker. They are generally controlled through an N/O type contact. The current offer of shunt trips proposes different supply voltages from 24 V to 480 V, compatible with AC and DC currents. The shunt trips are already equipped with a special fast connector, to be directly inserted into the auxiliary contact block. An auxiliary contact is connected in series with the coil, cutting off its power supply when the main poles are open.

SHUNT TRIP FOR DMX³ 2500 TO 6300

	FOR DMX ³
Size	2500 to 6300
Rated operating voltage Vn	24 V ~ / ... 48 V ~ / ... 110 - 130 V ~ / ... 220 - 250 V ~ / ... 415 - 440 V ~
Voltage range (% Vn)	70 to 110
Pick-up consumption (W/VA)	500/500
Pick-up time (ms)	180
Hold-in consumption (W/VA)	5/5
Opening time (ms)	30
Insulation voltage (kV)	2.5

UNDERVOLTAGE RELEASE

Undervoltage releases are devices which are generally controlled by an N/C type contact. They trigger instantaneous opening of the circuit breaker if their supply voltage drops below a certain threshold and in particular if the control contact opens. These releases are equipped with a device for limiting their consumption after the circuit has been closed.

UNDERVOLTAGE RELEASE FOR DMX³ 2500 TO 6300

	FOR DMX ³
Size	2500 to 6300
Rated operating voltage Vn	24 V ~ / ... 48 V ~ / ... 110 - 130 V ~ / ... 220 - 250 V ~ / ... 415 - 440 V ~
Voltage range (% Vn)	85 to 110
Pick-up consumption (W/VA)	500/500
Pick-up time (ms)	180
Hold-in consumption (W/VA)	5/5
Opening time (ms)	60
Insulation voltage (kV)	2.5

CLOSING COILS

These coils are used for remotely controlling closing of the circuit breaker power contacts. The springs of the circuit breaker should be loaded prior to the action of the closing coils. They are controlled by an N/O type contact.

CLOSING COILS FOR DMX³ 2500 TO 6300

	FOR DMX ³
Size	2500 to 6300
Rated operating voltage Vn	24 V ~ / ... 48 V ~ / ... 110 - 130 V ~ / ... 220 - 250 V ~ / ... 415 - 440 V ~
Voltage range (% Vn)	85 to 110
Pick-up consumption (W/VA)	500/500
Pick-up time (ms)	180
Hold-in consumption (W/VA)	5/5
Opening time (ms)	50
Insulation voltage (kV)	2.5

MOTOR OPERATORS

Motor operators are used for remotely reloading the springs of the circuit breaker mechanism immediately after the device closes. The device can thus be re-closed almost immediately after an opening operation.

To motorise a DMX³ it is necessary to add a release coil (undervoltage release or shunt trip) and a closing coil.

If the supply voltage of the controls fails, it is still possible to reload the springs manually. Motor-driven controls have "limit switch" contacts which cut off the power supply of their motor after the springs have been reloaded. Motor operators are easy to mount, with only three screws.

MOTOR OPERATOR FOR DMX³
2500 TO 6300

SAFETY AND PADLOCKING ACCESSORIES FOR INCREASED SECURITY

Draw-out type DMX³ circuit breakers are delivered as standard with safety padlocking shutters preventing access to live terminals. They have a number of other safety devices, such as:

- Key-operated locks:
 - Main contacts open
 - Circuit breaker in draw-out position
- Padlocks for:
 - Main contacts open
 - Contact shutters closed (for draw-out position)
- Door locking in order to prevent opening of the distribution board door when the contacts of the ACB are closed.

FIXED VERSION EQUIPPED WITH PADLOCKING SYSTEM

DRAW-OUT VERSION EQUIPPED WITH KEY-OPERATED LOCKS

All control accessories can easily be installed without any special tool and in a very short time.

They should be installed on the front of the air circuit breaker. In that way, the separation between power and control circuits is guaranteed.

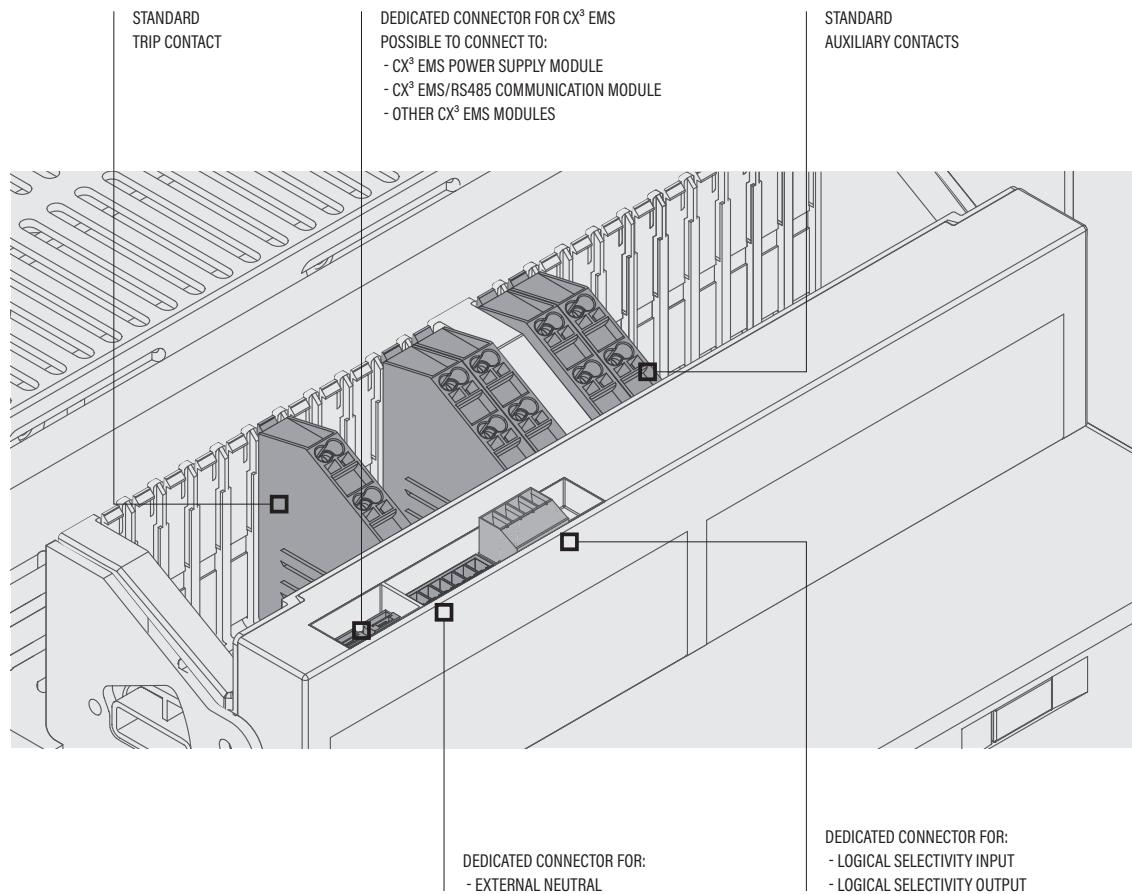

Easy identification of control accessories

Electrical auxiliaries are connected on the front of terminal blocks provided for this purpose. Accessories are identified on the front.

As the cover has a window, it is easy to ascertain, which devices are fitted on the circuit breaker.

FRONT CONNECTION TERMINAL BLOCK

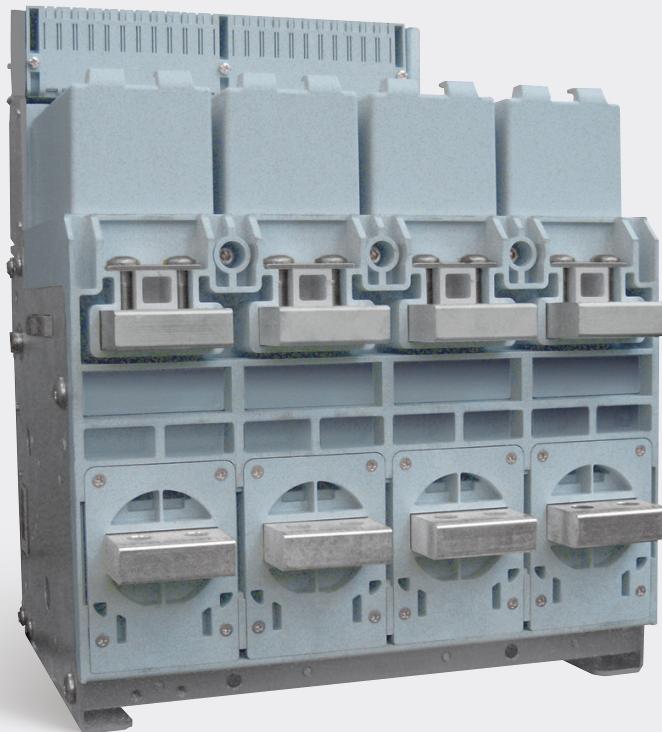

The terminal block of DMX³ ACBs offers the possibility of connecting a trip contact with up to 10 auxiliary contacts and other different control and signalling functions

The draw-out version of the DMX³ breakers is supplied with rear terminals for flat connection with bars. You can easily transform the rear terminals into vertical or horizontal type by using the unique reversible connector.

FLAT CONNECTION USING THE REAR TERMINALS OF THE BREAKER

CONNECTIONS: A FEW RECOMMENDATIONS!

- Connections provide the electrical connection of equipment and are also responsible for a considerable proportion of their heat dissipation.
- Connections must never be under-sized.
- Plates or terminals must be used over a maximum area.
- Heat dissipation is encouraged by arranging the bars vertically. If an uneven number of bars is connected, place the higher number of bars on the upper part of the terminal.
- Avoid bars running side by side: this causes poor heat dissipation and vibrations.
- Place spacers between the bars to maintain a distance between them which is at least equivalent to their thickness.

AUTOMATIC TRANSFER SWITCHES

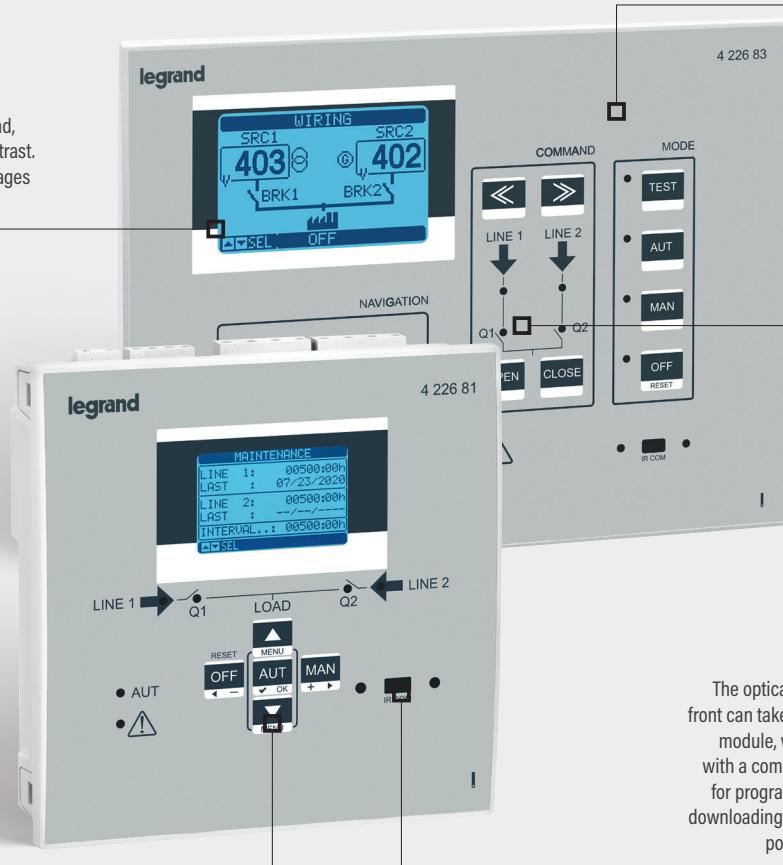

Backlit screen, very easy to read, adjustable brightness and contrast. Menu available in 5 or 8 languages depending on unit model

Stylish ergonomic design

Touch-sensitive buttons for programming the various operating parameters directly on the control unit

Clear marking on the front panel for easy identification of the various functions

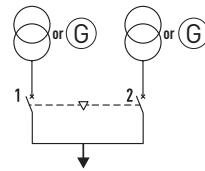

The optical communication port on the front can take a USB or a Wi-Fi connection module, which allows communication with a computer, smartphone or a tablet for programming, diagnostics and data downloading, without having to cut off the power to the distribution board.

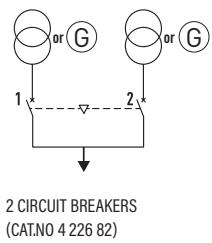

Continuity of service & increased safety

Automatic transfer switches satisfy the dual need of continuity of service and greater safety (security). Traditionally used in hospitals, public buildings, industries with continuous manufacturing processes, airports and military applications, automatic transfer switches are increasingly required for new applications such as telecommunications and data processing or in the management of energy sources, notably so-called "renewable energies". Our range of control units includes 3 different types, depending on the desired service level.

FOR STANDARD MANAGEMENT OF 2 CIRCUIT BREAKERS

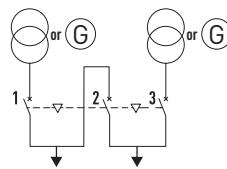

2 CIRCUIT BREAKERS
(CAT.NO 4 226 81)

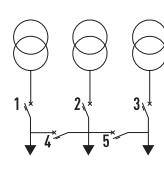

2 CIRCUIT BREAKERS
(CAT.NO 4 226 82)

FOR ADVANCED MANAGEMENT OF 3 CIRCUIT BREAKERS AND 2 POWER SOURCES

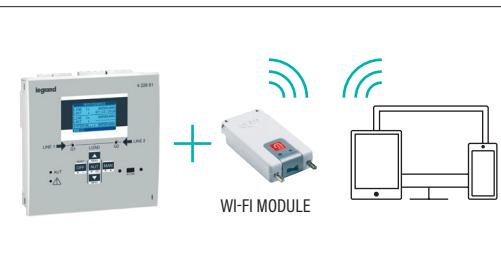

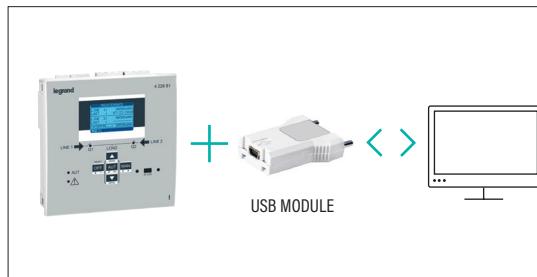

3 CIRCUIT BREAKERS
(CAT.NO 4 226 83)

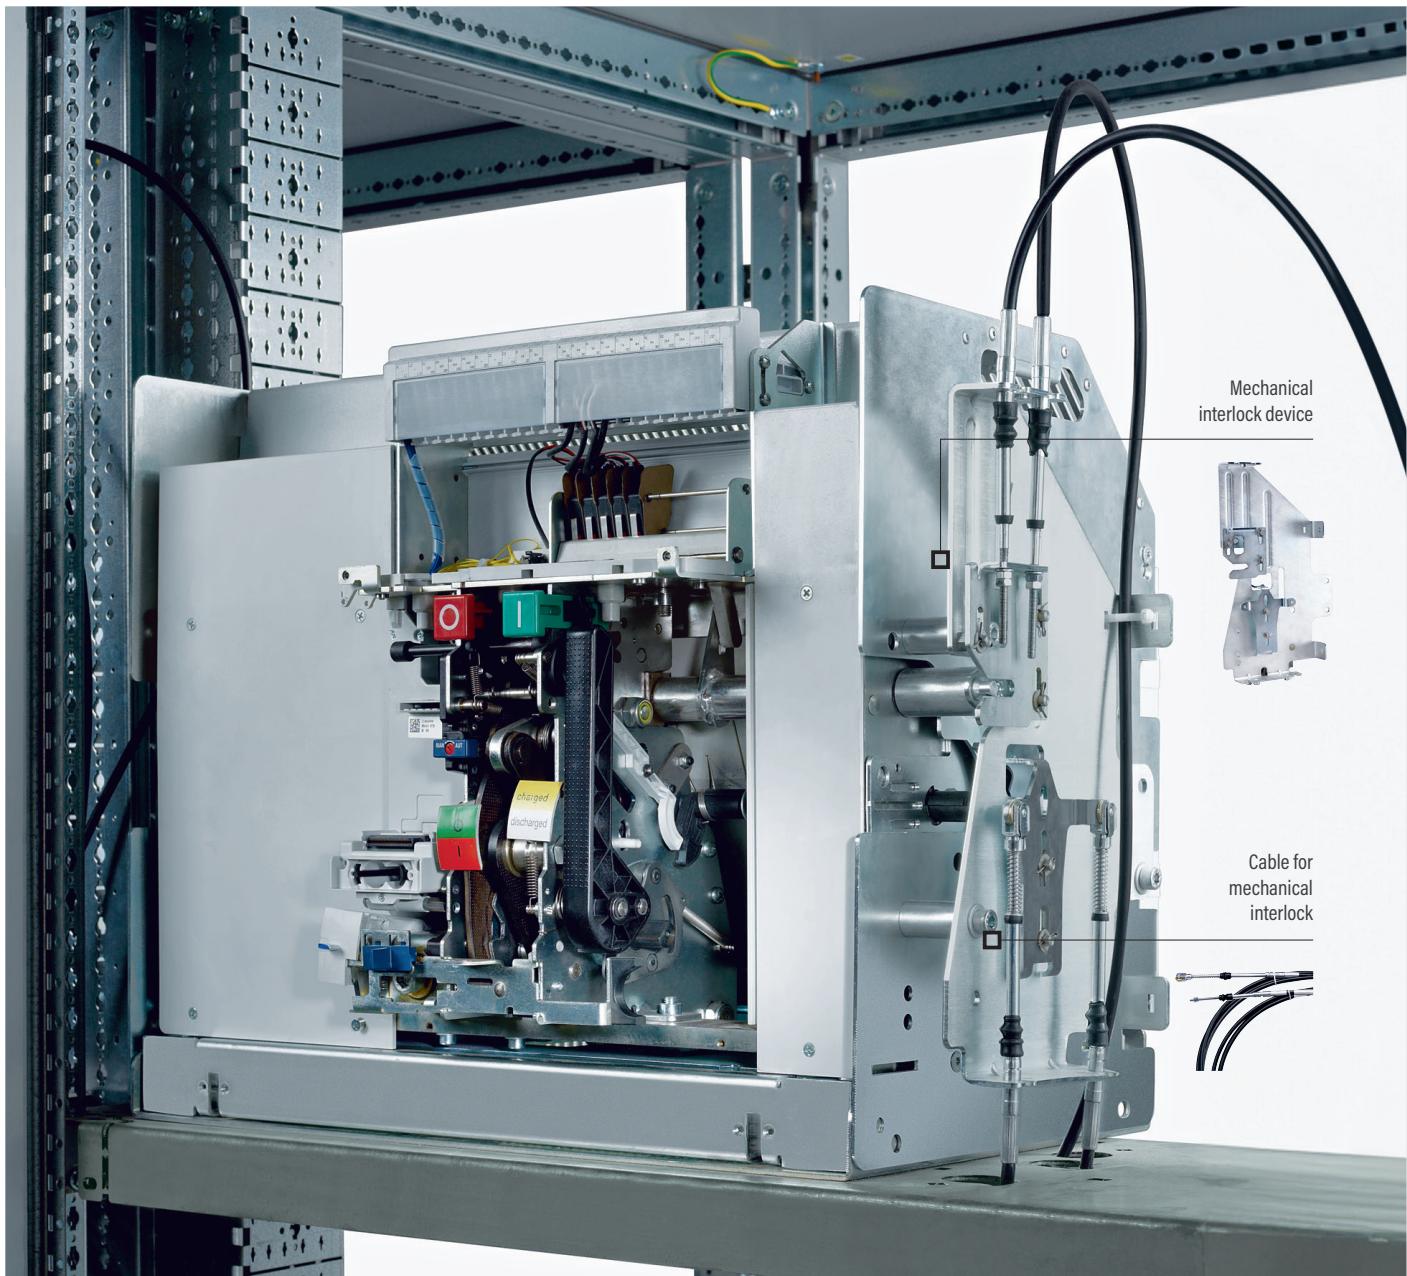

5 CIRCUIT BREAKERS
(CAT.NO 4 226 84)

The 4 automation control units for supply inversion are fitted with an optical port designed to take communication modules. These modules can be used to configure the control units via a PC, tablet or smartphone, on which the software or Legrand app has already been installed.

LEGRAND ADVANTAGE

Thanks to its digital display and different LEDs it is possible to view the inverter status continuously, as well as the presence and the value of the voltage on each power supply.

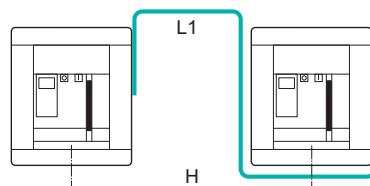

Transfer switching & interlocking

Mechanical interlocking is set up using cables and a mechanical interlock device and can interlock 2 or 3 devices, which may be different types in a vertical or horizontal configuration.

The interlock device is mounted on the right-hand side of the air circuit breaker.

XL³ DO

XL³DO enclosure

Be free to choose a fully adaptable enclosure

It is very easy to create the configuration you want thanks to the different available sizes of XL³ DO 4000 or XL³ 4000 and 6300 enclosures.

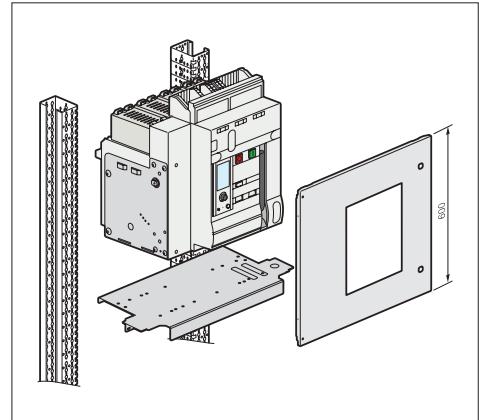

A full range of accessories, such as dedicated fixing plates and faceplates, facilitates the integration of DMX³ devices inside the enclosures.

XLPro³ software let you choose the optimum configuration between XL³ and XL³ DO, according to the size and the requirements of your installation.

DMX³ FIXED VERSION

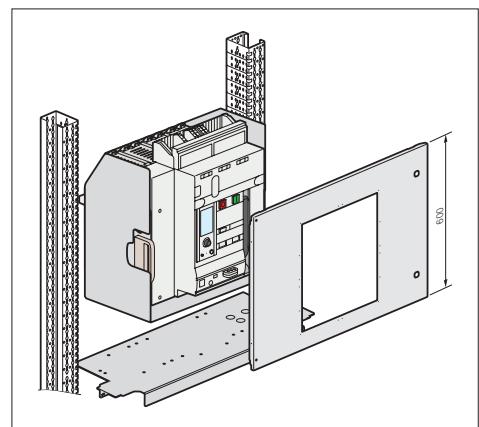

DMX³ SIZE 2500

DMX³ DRAW-OUT VERSION

DMX³ SIZE 2500

MOUNTING PRINCIPLE

In XL³ and XL³ DO, the DMX³ devices and the associated busbars are arranged according to an identical principle for power ratings up to 4000 A, that is, the possibility of mounting two devices per enclosure.

The installation height of DMX³ units is always 600 mm whatever the type and size of the device. When 2 DMX³ devices are installed in the same cubicle, this leaves at least 600 mm usable for running the busbars.

External neutral

For DMX³ 6300

For DMX³ 2500 and DMX³ 4000

Electronic protection units for DMX³ 2500, 4000 and 6300

Settings and curves p. 47

DMX³ circuit breakers must be equipped with electronic protection units (to be ordered together for factory assembly) enabling very precise adjustments of the protection conditions, while maintaining total discrimination with downstream devices

Pack Cat.Nos MP4.10 protection units with LCD screen

1	0 283 06	Integrated LCD screen for displaying electrical values, settings and log Equipped with batteries for powering in case of main fault or when the breaker is open or not connected Adjustment via rotating encoder Adjustmen of Ir, tr, isd, tsd, li, lg and tg Possibility to enable/disable protections Without mesure t(s) With mesure Measure and display instantaneous, maximum and average values of different electrical values and protection conditions Fault signaling and log
1	0 283 07 ¹	 Protection unit MP4.10 & MP 4.10 with measure LSig <ul style="list-style-type: none">Long time delay protection against overloads Ir from 0.2 to 1 x In (Step 1A) - OFFLong delay protection operation time tr = 40 ms ÷ 30 s (step 40 ms)Short time delay protection against short circuits Isd from 1,5Ir to 10 Ir - OFF (step 1A)Short time delay protection operation time (t=k, I2t=k) tsd = 40 ms ÷ 1 s (step 40 ms)Instantaneous protection against very high short circuits li from 2 to 15 In - OFF (step 1A)Earth fault current lg from 0.2 ÷ 1In - OFF (step 0.1In)Time delay on earth fault tripping (t=k, I2t=k) tg from 80 ms ÷ 1s (step 40 ms)Neutral protection IN = 50% - 100% - 150% - 200% - OFF

1: For the correct working of metering function it's necessary to connect a CX³ EMS power supply module Cat.No 4 149 45

2: EnerUp + Project App for smartphone and tablet available on Apple Store and Google Play. Configuration, monitoring and management software (PCS) available for download via e-catalogue (does not require the use of Bluetooth communication key Cat.No 0 283 10)

3: Optional accessories, to be ordered when ordering electronic protection unit and DMX³ air circuit breakers for factory assembly

Rear terminals

For DMX³ frame 2500 fixed version

For flat connection with bars
To be fixed onto horizontal rear terminals of the circuit breaker

For vertical connection with bars
Those terminals are used in order to transform a flat connection into a vertical one
To be fixed onto Cat.Nos 0 288 84/85 according to the number of poles

For DMX³ frame 2500 draw-out version

For vertical or horizontal connection with bars
To be fixed onto plate rear terminals of the circuit breaker

For DMX³ frame 4000 and 6300 fixed version

For flat connection with bars
To be fixed onto horizontal rear terminals of the circuit breaker
2 sets are required for frame 6300

For DMX³ frame 4000 and 6300 fixed or draw-out version

On DMX³ fixed version:
- For vertical connection with bars
- To be fixed onto Cat.Nos 0 288 92/93 according to the number of poles
On DMX³ draw-out version:
- For vertical or horizontal connection with bars
- To be fixed directly onto plate rear terminals of the circuit breaker
2 sets are required for frame 6300

Pack	Cat.Nos

Technical characteristics p. 51
Configuration software see e-catalogue

They can control transfer switching between sources, manage generator start/stop, control single phase, two-phase and three-phase networks, control phase-phase and phase-neutral voltages
For DPX³ and DMX³ circuit breakers and CTX³ contactors

Pack	Cat.Nos	Automatic transfer switch control units	Pack	Cat.Nos	Dual power supply selector
1	4 226 81 ¹	For standard management of 2 circuit breakers 6 programmable digital inputs and 7 programmable relay outputs LCD display IR communication port on the front panel for connection of USB or WiFi modules Cat.Nos 4 226 87/88 Can be configured with the help of front panel touch keys or of the Legrand dedicated software Power supply: 110-240 V~ IP40	1	4 226 86	Dual power supply selector measures and controls two supply voltages at its inputs (single phase, 230 V~) and selects the most adapted voltage for auxiliary circuits supply Equipped with 1 alarm contact, if no supply voltage can be selected within the limits
1	4 226 82 ¹	For advanced management of 2 circuit breakers 6 programmable digital inputs and 7 programmable relay outputs Can be equipped with maximum 2 plug-in modules between: - extension modules Cat.Nos 4 226 90/91/92 - opto-isolated RS485 communication interface Cat.No 4 226 89 LCD display IR communication port on the front panel for connection of USB or WiFi modules Cat.Nos 4 226 87/88 Can be configured with the help of front panel touch keys or of the Legrand dedicated software Power supply: 12-24 V~ ; 110-240 V~ IP40	1	4 226 89	Plug-in modules
1	4 226 83 ¹	For advanced management of 3 circuit breakers and 2 power sources 8 programmable digital inputs and 7 programmable relay outputs Can be equipped with maximum 3 plug-in extension modules between Cat.Nos 4 226 90/91/92 Integrated opto-isolated RS485 communication interface LCD display IR communication port on the front panel for connection of USB or WiFi modules Cat.Nos 4 226 87/88 Can be configured with the help of front panel touch keys or of the Legrand dedicated software Power supply: 12-24-48 V~ ; 110-240 V~ IP65	1	4 226 90	Opto-isolated RS485 interface
1	4 226 83 ¹	For advanced management of 3 circuit breakers and 2 power sources 8 programmable digital inputs and 7 programmable relay outputs Can be equipped with maximum 3 plug-in extension modules between Cat.Nos 4 226 90/91/92 Integrated opto-isolated RS485 communication interface LCD display IR communication port on the front panel for connection of USB or WiFi modules Cat.Nos 4 226 87/88 Can be configured with the help of front panel touch keys or of the Legrand dedicated software Power supply: 12-24-48 V~ ; 110-240 V~ IP65	1	4 226 91	2 relay outputs, rated 5 A 250 V~
1	4 226 84 ¹	For advanced management of 5 circuit breakers and 3 power sources 12 programmable digital inputs and 11 programmable relay outputs Can be equipped with maximum 3 plug-in extension modules between Cat.Nos 4 226 90/91/92 Integrated opto-isolated RS485 communication interface LCD display IR communication port on the front panel for connection of USB or WiFi modules Cat.Nos 4 226 87/88 Can be configured with the help of front panel touch keys or of the Legrand dedicated software Power supply: 12-24-48 V~ ; 110-240 V~ IP65 Must be factory configured to fit installation needs Please ask for ATS order form.	1	4 226 92	2 opto-isolated digital inputs and 2 relay outputs rated 5 A 250 V~
					Communication accessories These communication devices can be used to connect Alptec 8 and Alptec 3.2/5.2/8.2 power factor controllers (p. 123) and automatic transfer switch controllers to a computer; smartphone or tablet For programming, downloading data, diagnostics and upgrading the firmware
			1	4 226 87 ¹	USB front connector Computer connection cable with USB connector The computer identifies the connection as a standard USB connection. There is no need to switch off the controller power supply
			1	4 226 88 ¹	Wi-Fi front connector Wi-Fi connection device compatible with computers, smartphones and tablets There is no need to switch off the controller power supply

1: Configuration software available for download via e-catalogue
ACU Configurator app for smartphone and tablet available on Apple Store and Google Play

electronic protection units

Settings of the electronic protection units

MP4.10

Ir, tr, lsd, tsd, li, lg, tg adjustment

• Long time delay protection against overloads

Ir from 0.2 to 1 x In with steps of 1 A
Protection: ON/OFF

• Long delay protection operation time

tr from 40 ms to 30 s (@6Ir) with steps of 40 ms
Thermal memory: ON/OFF

• Short time delay protection against short circuits

lsd from 1.5 to 10 x Ir with steps of 1 A
Protection: ON/OFF

• Short time delay protection operation time

tsd from 40 ms to 1 s with steps of 40 ms
(both t=k and i²t=k)

• Instantaneous protection against very high short circuits

li from 2 to 15 x In or lciw with steps of 1 A
Protection: ON/OFF

• Earth fault current

lg from 0.2 to 1 x In with steps of 1 A
Protection: ON/OFF
tg from 80 ms to 1 s with steps of 40 ms
(both t=k and i²t=k)

• Neutral protection

OFF - 50% - 100% - 200%

6300	7 x 100 x 10	7 x 100 x 10

Note: The tables presenting the minimum recommended dimensions of connection plates and bars per pole should be used solely as a general guideline for selecting products. Due to extensive variety of switchgear constructions shapes and conditions that can affect the behavior of the apparatus, the solution used must always be verified.

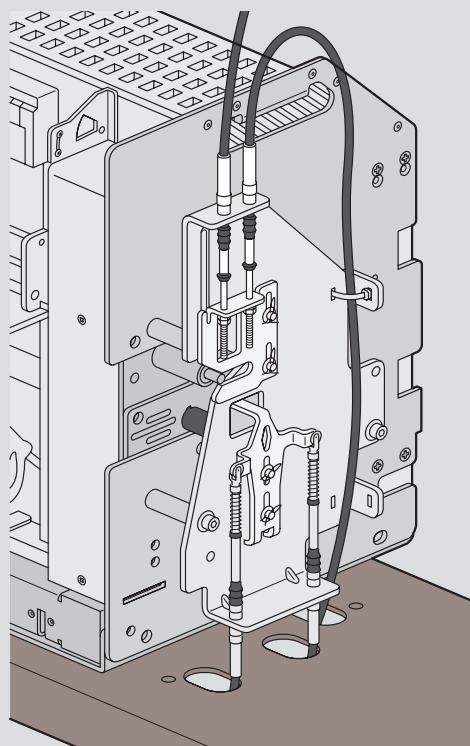

For minimum recommended dimensions
of aluminium busbars
