

CLASSE 300EOS

The Evolution Of Smart.

legrand®
LIVE THE ADVANTAGE

CLASSE 300EOS

THE EVOLUTION OF SMART

Video door
entry system

Management
with smartphone

Voice
control

Smart
Security

Classe 300EOS is the new 2 wires / Wi-Fi handsfree connected video internal unit with built-in Amazon Alexa voice assistant. Using the Home + Security App, in addition to video door entry calls, it is also possible to manage the devices of the Legrand connected security solutions, creating a simple and fast Smart security system.

CLASSE
300EOS

Change your idea of a video internal unit.

The smart vision of the home.

Distinctive design to meet the needs of contemporary living.
Vertical and super slim. With its clean and modern design,
it gives every type of home an innovative look,
and offers a unique user experience.

Vertical display and curved shape:
a disruptive and modern design,
but also understated.

5" Touch Screen

Vertical display
for a better view
of the caller

Face detection

Automatic centring of the
subject on the display

Horizontal display

Double "tap" the display
to view the image
in landscape format

Curved shape

The shape of a welcome:
a "welcoming effect"
for residents and guests.

VIDEO DOOR ENTRY SYSTEM

Advanced interface.

Intuitive use

For simple smartphone-like gestures (swipe function)

Quick tips

To guide you and suggest in a dynamic way

- 1 Led**
- Wi-Fi connection status
 - Presence of notifications
 - Ringtone exclusion

- 2 Notifications**
- Missed calls
 - Messages
 - System information

- 3 Suggestion area**
- Guided configurations
 - System information
 - Last notification
 - Useful tips

- 4 Door entry functions**
- Activate the camera
 - Answer the call
 - Favourite functions
 - Activation of the electrical door lock

- 5 Favourite actions**
- 2 quick actions
 - Favourite menu

Always aware with the Home + Security App

The best App for a safe home

with your single account

Home + Security

Incoming call

Receive notification
when someone
is calling

See who's calling

Answer the call and
open the gate for
the courier

Check the events

Check who called you
and if they left you
a message

Quick actions

- Activate the electrical door locks
- Activate the timed staircase lights
- Call home / Intercom
- Activate the cameras
- Manage the video door entry answering machine

Security enhancement with integration of devices

Video door entry system and security. Together.

Video door entry system

Main entrance
Incoming entrance call.

Security

Secondary entrance and interiors
Smart Outdoor Camera and Smart Indoor Camera with face recognition.

A single App with an intuitive home page. It allows you to answer video door entry calls, activate the door lock and view images from smart outdoor and indoor cameras.

Professional opportunity: offer your services as an installer of simple smart security systems.
Business opportunities: access to a catalogue of smart and easy-to-install security devices.

Home + Security
The best App for a safe home.

Solutions for a smart protection of your Home: Security Indoor & Outdoor Cameras.

Leave your home without worries.

Legrand connected security solutions natively integrated in the Home + Security App

Smart Outdoor Camera

Smart Indoor Camera

ALEXA BUILT-IN

The first video internal unit with built-in Alexa

Enjoy the full Alexa experience
interacting with all its functions, such as:
Custom routines - Play Music - Smart Home
To set the clock alarms - Memos and
video door entry functions.

Add any compatible “works with Alexa” devices, to offer your customers an increasingly Smart home.

NOTE: Alexa is not available in all languages and Countries.
Alexa features and functionality may vary by location.

2 wires standard installation

Wall mounted installation using the bracket supplied with no need of masonry works. Built-in Wi-Fi connectivity and same installation rules as for the 2 wires video internal units.

No changes to your working habits.
Same installation rules as for the 2 wires video internal units.

Forget complex installations and configurations of Ethernet networks, and continue to enjoy the **simplicity of 2 wires solutions**. Everything stays the same thanks to the Wi-Fi technology integrated in the video internal unit.

Simple and intuitive configuration

The configuration requires no IT skills.

You must only configure the classic 2 WIRES system parameters (entrance panel and internal unit SCS addresses, etc.). Your customer manages all the configurations of the Wi-Fi network and the App independently and intuitively. If necessary one can follow the information on the video door entry display and inside the Home + Security App menu.

Installation, connection of the two BUS wires, configuration of the main system parameters: job done!

Immediate and simple to associate

After the App download, a guided procedure allows the association between smartphone and Classe 300EOS.

A few simple guided steps to complete the association of the App with the video internal unit

1

After downloading the H+S App to your smartphone from the store or using the QR code on the video internal unit, simply select «START CONFIGURATION».

2

Select the Classe 300EOS device in the H+S App menu.

3

The video internal unit has a QR Code, which can simply be framed in the H+S App to complete the association within the same Wi-Fi network.

4

After the association, the device is configured and ready for use.

The connection to the dedicated Cloud totally and safely automates the configuration on the home network (you do NOT need to configure your router). The video internal unit transfers all the configuration of the 2 WIRES video door entry system (cameras, door locks, activations etc.) to the App. From Smartphone, using the App, you can always display the mobile devices associated to it and decide which to disconnect or cancel at any time.

Suitable for all home environments

FOR THE VILLA OR FOR ONE&TWO-FAMILY CONTEXT

The easiest way
to make your home safer.

INSTALLER INFO

Built-in connectivity for constant
connection with the home.

Complete the system with Legrand connected
security solutions: outdoor and indoor cameras,
for a simple, smart and complete
protection of the home.

One single App (Home + Security)
for the video door entry functions
and the security of the home.

No extra work for the installer;
easier to use for the end user.

REAL ESTATE AND INSTALLER INFO

Alexa ready apartments,
for a first level Smart Home.

Preparation of the single apartment system for
future expansions using Legrand connected
security solutions. Leaving to the end user the
freedom to customize their home even at a later
date.

One single App (Home + Security)
for the video door entry functions
and the security of the home.

Flexible solution, suitable for every context
and adaptable to every customer.

Warning: in multi-family systems (apartment blocks)
you need the extra power supply of the CLASSE 300EOS
video internal unit (install 1 extra power supply
346020 for each Classe 300EOS).

FOR APARTMENT BLOCK OR MULTI-FAMILY CONTEXT

Install, configure and activate
the system on location. All that
your customer will then need to
do, is to associate the H + S App to
the system using their smartphone.

NOTE: for the sizing of multi-family systems refer to the General Installation
Standards of the 2 Wires System Technical Guide.

*Users can have only one Classe 300EOS configured as smart home touch screen.

✓	History of the events

Classe 300EOS Catalogue

344842

344844

346020

Item	CLASSE 300EOS CONNECTED VIDEO INTERNAL UNIT
344842	2 wires/Wi-Fi handsfree connected video internal unit with built-in Amazon Alexa voice assistant, 5" vertical touch screen LCD display and video door entry answering machine. It has a physical key for door lock release and capacitive keys for the control of the main video door entry functions: handsfree communication, entrance panel activation / camera scrolling and Favourite key (can be configured to activate the quick actions most frequently used – e.g. additional door locks, staircase light control, intercom). There are notification LEDs for: Wi-Fi network connection status, info / notifications and call exclusion. It is possible to easily interact with the built-in Alexa voice assistant, either using the dedicated capacitive keys or with your voice, and activate several functions, such as the video door entry functions, Smart Home, scenarios, reminders etc. Using the touch display, it is possible to access the notification list, as well as your favourite door entry, security and Smart Home controls (if any). Possibility of voice communication with the switchboard - if present in the system - after a specific call. The device must be configured by physically connecting the configurators, or using the menu, which will give better possibilities of customisation of associated functions and texts. Thanks to the Wi-Fi connection, you can associate the video internal unit to the Home + Security App (available for Android and iOS). The App allows to use the main video internal unit functions (receiving calls, door lock release, display of the event timeline and activation of the entrance panel/camera cycling). Through the Home + Security App, it is also possible to manage the products of the Legrand connected security solutions (outdoor and indoor cameras). This allows you to quickly and easily create a Smart security system. Wall mounted installation using the supplied bracket Possibility of Wi-Fi connection or using RJ45 ethernet cable with the dedicated accessory 344844.

Item	ETHERNET ACCESSORY
344844	Accessory cable for the wired connection of the Classe 300EOS video internal unit using an RJ45 Ethernet cable. To be purchased separately.
Item	2 DIN ADDITIONAL POWER SUPPLY
346020	Additional 2 DIN power supply to be used to supply the connected CLASSE 300EOS video internal unit (344842) locally, when required.

Recording only in case of intrusion, in respect of the privacy of the family. Encryption protected access to the smartphone using the Home + Security App. Declaration of conformity and FCC declarations. Open-source compatibility. It has to be connected to an electric socket with the supplied AC adapter.

Dimensional data

Classe 300EOS

Legal notes

To use the video door entry call repeat service on a smartphone, the customer must acquire the technical equipment which allows access to the Internet, on the basis of an agreement made by the customer himself with an ISP (Internet Service Provider). Legrand plays no part in this. The customer must install the Home + Security App on his smartphone so that he can use some services which Legrand supplies as extras to the normal basic functions of the Classe 300EOS video internal unit. The services offered by means of the App require being able to interact with Classe 300EOS remotely and through the Internet. In these cases, the integration and good working between the video internal unit and App may depend on:

- a) quality of the Wi-Fi signal;
- b) type of access contract to the home internet;
- c) type of data contract on the smartphone

When one of these 3 elements does not conform with the specifications required for product operation, Legrand accepts no responsibility for any faults. The product supports a VoIP streaming system. You must therefore check with your smartphone contract – data network – that it does not block it. We should also like to inform you that the service provided by Legrand – remote use via App – involves the use of data. The cost linked to data usage depends on the type of contract which the customer has with his ISP (Internet Service Provider) and is solely the customer's responsibility.
