

Product Environmental Profile

**Mylinec™ - Four units of 6/16A 3 pin Combined
Shuttered Sockets 2 Modules - White**

■ CONSTITUENT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market. It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/EU.

Total weight of Reference Product		425 g (with unit packaging)			
Plastics as % of weight		Metals as % of weight		Packaging as % of weight	
PS	22.5 %	Copper alloys	5.3 %	Paper (packaging)	21.2 %
ABS	19.3 %	Steel	4.5 %	PP (packaging)	3.2 %
PP	9.9 %	Other metal	3.9 %		
PC	8.6 %				
PA	1.6 %				
				PE (packaging)	< 0.1 %
Total plastics	61.9 %	Total metals	13.7 %	Total other and packaging	24.4 %

Estimated recycled material content: 20 % by mass.

■ MANUFACTURE

This Reference Product comes from sites that observe the applicable legislation for industrial sites.

■ DISTRIBUTION

Products are distributed from logistics centres located with a view to optimize transport efficiency. The Reference Product is therefore transported over an average distance of 410 km by road from our warehouse to the local point of distribution into the market in India.

Packaging is compliant with applicable regulation. At their end of life, its recyclability rate is 87 % (in % of packaging weight).

■ INSTALLATION

For the installation of the product, only standard tools are needed.

■ USE

Under normal conditions of use, this product requires no servicing, no maintenance or additional products.

Product Environmental Profile

**Mylinec™ - Four units of 6/16A 3 pin Combined
Shuttered Sockets 2 Modules - White**

END OF LIFE

The product end-of-life factors are taken into account during the design phase. Dismantling and sorting of components or materials is made as easy as possible with a view to recycling or failing that, another form of reuse.

• Recyclability rate:

Calculated using the method described in technical report IEC/TR 62635, the recyclability rate of the product is estimated at 94 %. This value is based on data collected from a technological channel operating on an industrial basis. It does not pre-validate the effective use of this channel for the end of life of this product.

Separated into:

- plastic materials (excluding packaging) : 59 %
- metal materials (excluding packaging) : 14 %
- packaging (all types of materials) : 21 %

ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use and end-of-life. It is representative from products marketed and used in India.

For each phase, the following modelling elements were taken into account:

Manufacture	Materials and components of the product, all transport for the manufacturing, the packaging and the waste generated by the manufacturing.
Distribution	Transport between the last Group distribution centre and an average delivery point in the sales area.
Installation	The end of life of the packaging.
Use	<ul style="list-style-type: none"> • Product category: passive product. • Use scenario : non-continuous operation for 20 years at 30% of rated load, during 30% of the time. This modelling duration does not constitute a minimum durability requirement. • Energy model: Electricity Mix, India - 2009.
End of life	The default end of life scenario maximizing the impacts.
Software and database used	EIME V5 and its database «CODDE-2015-04»
